

WEBSITE · VERSION 4

Homepage — *summary of changes.*

A record of the work carried out on the homepage in response to the Version 3 review. The concept and editorial identity were preserved; the B2B information architecture underneath it was strengthened.

MADALENA BEÇA KNITWEAR

13 SEPTEMBER 2026

HEADER & NAVIGATION

A single, clear *primary action*.

- Navigation kept **fixed on scroll**, with sufficient opacity and blur to stay legible over imagery.
- Approved **MBK wordmark** used consistently, plus favicon / loading treatment.
- Header CTA renamed “**Let’s Talk**” → “**Start a Project**” — the single primary CTA, upper-right.
- Removed the duplicate CTA from the hero; the closing section is now the natural conversion point.
- **Mobile:** logo left, menu right, and the CTA moved inside the menu as a prominent button.
- Navigation bar height reduced by roughly half for a lighter presence.

TYPOGRAPHY, RHYTHM & COMPOSITION

One coherent *system*.

- Unified type scale — section headings collapsed from **eight different sizes to two** shared tokens.
- Increased the contrast of the small uppercase labels across the page (they were too pale).
- Normalised vertical rhythm and section spacing for a consistent, efficient page.
- Intentional section openings — the hero reads as one complete first screen across breakpoints.
- Consistent content grid and safe area beneath the fixed navigation.

HOMEPAGE STRUCTURE

The page, *section by section.*

01 Hero

Added the B2B descriptor (“Specialised flat-knit development and manufacturing for fashion brands...”), rebalanced the headline, strengthened the reference contrast and smoothed a visible edge in the fade (with a reduced-motion path).

03 Product breadth

Replaced the carousel with five always-visible category cards. “Knitted for women” removed in favour of “Knitwear across collections.”

05 Studio

New capability-focused copy over a process image, with an “Explore the Studio” link; the editorial signature was removed.

07 From the Journal

Three complete article cards, fully visible with no required interaction, plus “Explore all articles.”

02 MBK in one view

Removed the full-screen statistics module and replaced it with a compact company introduction plus three equal proof points.

04 How We Work

Replaced the long scroll-controlled process with a compact five-stage horizontal sequence, plus a link to the full page.

06 Responsibility

Precise headline — “Certified standards. Responsible manufacturing.” Height reduced; certification years and Ecocert kept legible.

08 Closing CTA & footer

Kept the dark photographic fade; height reduced by $\sim\frac{1}{3}$; added the “Start a Project” CTA, compact contacts and a discreet legal/privacy bar.

TECHNICAL & ACCESSIBILITY

Built to *launch well.*

- Added a **skip link** and a proper main landmark for keyboard navigation.
- All homepage images moved to **optimised delivery** — lazy-loaded, dimensioned (no layout shift) and served in modern web formats.
- **Reduced-motion** alternative applied across every animation, including scroll-controlled motion.
- Mobile QA — no horizontal overflow, no oversized headings, sticky behaviour verified.

STILL TO DO — PRE-LAUNCH

- **SEO & sharing metadata:** canonical URL, Open Graph, Twitter/X card, Organisation structured data, favicon declaration (finalised once the production domain and share image are set).
- **Legal pages:** Privacy Policy and Terms (the footer links are already in place).
- **Site-wide footer** reused consistently across all pages.
- **Journal:** editorial selection of the homepage articles (currently the three most recent).
